

DTV - Driver's Thermal Vision System

DTV is a driver vision enhancement system (DVE) designed for tanks and armored vehicles. The system provides complete vision of the vehicle's surroundings during day, night and fog conditions, while withstanding rugged terrain and harsh weather conditions.

The system is mounted on a robust, highly precise pan-tilt unit, along with a thermal camera - enabling safe observation from inside the vehicle using the compact, user-friendly Command and Control Unit.

- Designed for tanks and armored vehicles
- Fit for rugged terrain and harsh weather conditions
- Provides operator with complete vision of surroundings from inside the vehicle
- Fully compliance to MIL-STD
- Enables complete vision of surroundings from inside the vehicle
- Fit for rugged terrain and harsh weather conditions
- Optionl integrated Pan Unit
